A. General provisions

Art. 1 EuroMillions plus 2nd Chance – a coordinated lottery

1.1 EuroMillions plus 2nd Chance is a lottery product consisting of the EuroMillions game and the supplementary game 2nd Chance. Participation in the supplementary game 2nd Chance constitutes an intrinsic element of participation in the EuroMillions game.

1.2 EuroMillions is a lottery that is run simultaneously in various European countries (hereinafter referred to as "Contract Territories") by local lottery organizations (hereinafter referred to as "EuroMillions Lottery Organizations") in accordance with these organizations' respective Rules of Play and Terms and Rules, based on local licences. The number of Contract Territories in which the EuroMillions game takes place may vary upwards or downwards and is not subject to any guarantee. The list of local EuroMillions Lottery Organizations and Contract Territories, including any changes thereto, is published in accordance with Article 20 of these Rules of Play and Terms and Rules.

1.3 The various EuroMillions Lottery Organizations coordinate their activities in so far as they operate EuroMillions according to the organizational principle of a "common pool". This means that the stakes wagered in all Contract Territories are pooled, that with regard to all the Contract Territories one joint draw takes place, and that the winnings and the prize money are determined on a joint basis. The various EuroMillions Lottery Organizations consequently stipulate certain organizational modalities in consultation with each other. In all other respects, the individual local EuroMillions Lottery Organizations operate EuroMillions autonomously in their respective Contract Territories, for own account, at their own risk and for their own profit, each relying on their own technical and administrative infrastructure.

1.4 2nd Chance is a supplementary game that Swisslos and the Société de la Loterie de la Suisse Romande ("Loterie Romande" or "LoRo") run exclusively in Switzerland and the Principality of Liechtenstein according to their own Rules of Play and Terms and Rules, based on local licences and according to the organizational principle of a "common pool". This means that the stakes wagered are pooled, that one joint draw takes place, and that the winnings and the prize money are determined on a joint basis. Swisslos and Loterie Romande consequently stipulate certain organizational modalities in consultation with each other.

Art. 2 Organization of EuroMillions plus 2nd Chance in Switzerland

2.1 The issue and operation of EuroMillions plus 2nd Chance is governed by the Federal Act on Gambling of 29 September 2017, the Implementing Ordinance of 7 November 2018 to this Act, and the corresponding intercantonal and cantonal lottery regulations.

2.2 Swisslos, a cooperative domiciled in Basel, organizes EuroMillions plus 2nd Chance in the territory of German-speaking Switzerland¹, Ticino and the Principality of Liechtenstein (collectively the "Swisslos Contract Territory") in accordance with these Rules of Play and Terms and Rules.

¹ ZH, BE, LU, UR, SZ, OW, NW, GL, ZG, SO, BS, BL, SH, AI, AR, SG, GR, AG, TG

2.3 While so doing, Swisslos works with Loterie Romande, which operates EuroMillions plus 2nd Chance in the territory of French-speaking Switzerland² (the "LoRo Contract Territory") according to its own Rules of Play and Terms and Rules. Otherwise, Article 1.3 also applies to the relationship between Swisslos and Loterie Romande, particularly in terms of coordination with respect to determining exchange rates, spreading the gains and losses arising from currency differences, and determining the prize money in Swiss francs.

2.4 The common characteristics of EuroMillions as organized in the Swisslos and LoRo Contract Territories and the EuroMillions Lottery Organizations abroad are guaranteed by the fact that both these Rules of Play and Terms and Rules and the EuroMillions plus 2nd Chance Rules of Play and Terms and Rules issued by Loterie Romande, together with the Rules of Play and Terms and Rules issued by other European EuroMillions Lottery Organizations are based on the same uniform regulations.

2.5 Participation in EuroMillions plus 2nd Chance as defined in these Rules of Play and Terms and Rules are placed via the online system (including the Internet Gaming Platform [Internet]) made available by Swisslos. Subject to issuance of the necessary licences, Swisslos reserves the right to offer other options for participating in EuroMillions plus 2nd Chance.

2.6 These Rules of Play and Terms of Participation supplement the provisions governing the playing of Swisslos products via points of sales and via the Internet (online).

B. *Nature of EuroMillions plus 2nd Chance*

Art. 3 Nature of EuroMillions plus 2nd Chance

3.1 EuroMillions is a lottery that works on a totalizer principle, whereby players have to choose five out of 50 numbers from 1 to 50 as well as two "Star" numbers out of 12 numbers from 1 to 12.

EuroMillions also offers other ways to win prizes, details of which are advertised in advance (see Art. 13.11).

3.2 The supplementary game 2nd Chance is a lottery that works on a totalizer principle. It is played using fifty numbers from 1 to 50. Players use the exact same five numbers that they chose in the EuroMillions lottery.

3.3 The draw results (see Art. 11) consist firstly of the EuroMillions winning numbers including any winning codes, and, secondly, of the 2nd Chance winning numbers.

The EuroMillions winning numbers are determined by randomly drawing five numbers out of the possible 50 and two Star numbers out of the possible 12.

The winning codes are determined by drawing from all the registered participation codes.

² FR, VD, VS, NE, GE, JU

The 2nd Chance winning numbers are determined by drawing another five random numbers out of the possible 50.

C. Participation

Art. 4 General remarks

Players take part in EuroMillions plus 2nd Chance using

- play slips (documents with data carrier function) issued by Swisslos on which players can indicate their own predictions, or
- quick picks produced by Swisslos on a random generator.

A prediction consists of five out the possible 50 numbers and two out the possible 12 Stars.

In EuroMillions plus 2nd Chance, players can choose between individual picks and system plays.

Art. 5 Play slips and quick picks

5.1 The play slips for individual picks each comprise up to 12 entry fields. Each entry field consists of an upper field – the "number field" – containing 50 boxes numbered from 1 to 50, and a lower field – the "Star field" – containing 12 stars numbered from 1 to 12. Players should fill in their entry fields (one entry field per prediction) from left to right.

Play slips also include four "Super-Star" combinations, of which players can choose one, two, three or four. To enter the draw with the Super-Star combination of their choice, players must place a cross (x) in the "Yes" field printed next to the relevant combination on the play slip.

Players may enter Super-Star even if they do not take part in EuroMillions plus 2nd Chance. For information about Super-Star, please refer to the separate Super-Star Rules of Play and Terms of Participation.

5.2 Swisslos issues special play slips that enable players to make system plays. Only the system plays printed on these special play slips are permitted.

System plays work on a "full combination" principle, whereby possible predictions are combined using all the numbers and Stars that are crossed. The entry field on the left-hand side consists of an upper field – the "number field" – containing 50 boxes numbered from 1 to 50, from which players must choose five to 10 numbers. Players must also select two to 12 Stars from the lower field – the "Star field" – which contains 12 stars numbered from 1 to 12. The combination of numbers and Stars must correspond to at least seven predictions. There is only a limited number of permissible combinations (441 predictions at most). In the adjacent field, players should make a note in the left-hand column of the number of numbers selected from 1 to 50, and, on the bottom line, the number of Stars chosen. The matrix is used to determine the permissible prediction combinations including the corresponding stakes for each one.

Play slips also include four "Super-Star" combinations, of which players can choose one, two, three or four. To enter the draw with the Super-Star combination of their choice, players must place a cross (x) in the "Yes" field printed next to the relevant combination on the play slip.

Players may enter Super-Star even if they do not take part in EuroMillions plus 2nd Chance. For information about Super-Star, please refer to the separate Super-Star Rules of Play and Terms of Participation.

Detailed information about system plays can be found in the EuroMillions system brochure.

5.3 Players can also opt to play by making a quick pick instead of using the play slip. Quick picks are predictions produced at the Swisslos data processing centre via a random generator on the basis of the player's instructions stipulating the stake, the number of predictions required and the desired number of draws for EuroMillions plus 2nd Chance. These picks are recorded at the data processing centre, stored there and then transmitted to the online terminal without any need to fill out a play slip. In principle, the same game types can be played using the quick pick option as are available on the play slips.

5.4 Whether the player is using a play slip (all types) or using quick picks, he or she can tick the relevant checkboxes (1, 2, 4, 6, 8, 10) or select the respective instructions to choose the number of consecutive draws he or she wishes to enter. The player then takes part in the designated number of EuroMillions plus 2nd Chance draws with exactly the same predictions.

Art. 6 Conclusion of a contract

To play EuroMillions plus 2nd Chance in accordance with these Rules of Play and Terms of Participation, players must conclude a Gaming Contract with Swisslos. In concluding a Gaming Contract with Swisslos, players recognize unreservedly these Rules of Play and Terms and Rules, including any addendums, as well as the Super-Star Rules of Play and Terms of Participation when playing Super-Star, and the Terms for Participation of the relevant sales channel (points of sales or online).

Art. 7 Stake

7.1 The stake in EuroMillions plus 2nd Chance amounts to CHF 3.50 per prediction and draw. For subscription plays, the calculated stake is multiplied by the number of draws selected (number of predictions x number of draws). CHF 3.00 of the CHF 3.50 stake is used for the EuroMillions game, while CHF 0.50 goes towards the supplementary game 2nd Chance. The stake is payable in Swiss francs only.

7.2 The EuroMillions stake in all Contract Territories amounts to EUR 2.20 per prediction and draw. This amount is converted into Swiss francs for the Swisslos Contract Territory on the basis of the exchange rate set by Swisslos. All sales outlets provide details of the currently applicable stake per prediction in Swiss francs.

The actual converted EuroMillions stake on the days of the draw (Tuesday and Friday), based on the prevailing exchange rate into Swiss francs, may be above or below the calculated theoretical stake of CHF 3.00 per prediction owing to exchange rate fluctuations. In both the Swisslos and LoRo Contract Territories, prize money in EuroMillions prize categories 2 to 13 which is higher or lower than the prize money offered by EuroMillions Lottery Organizations using the euro as currency help to offset the resultant amount differences (see Art. 13.10-13.11).

Art. 8 Deadline

The deadline for submitting predictions, i.e. the closing time for each EuroMillions plus 2nd Chance draw, is set by Swisslos in consultation with Loterie Romande (see Art. 2.3) and in accordance with the arrangement stipulated by other European EuroMillions Lottery Organizations (see Art. 1.3 and 2.4). Details of these deadlines are available at all Swisslos sales outlets and via the electronic information channels used by Swisslos. The stakes wagered are always automatically played for the draws that are live at the time the stakes are entered into.

D. Treatment of data

Art. 9 Collection and storage of data

9.1 The data on play slips are transmitted to Swisslos once they are read in via the online terminal or entered online. When using quick picks via a sales outlet or the Internet, the same data are generated via the Swisslos central data centre, where they are recorded for evaluation purposes, and saved and stored on a physically or digitally secured medium.

9.2 If for any reason the data cannot be correctly forwarded to or stored at Swisslos and/or the organization entrusted by the EuroMillions Lottery Organizations with determining the winning amounts such as to allow holders of a prizewinning ticket or replacement ticket to claim their prize, or if for any reason a fundamentally valid winning ticket or replacement ticket or confirmation of a valid prize claim cannot be honoured on presentation, the liability borne by Swisslos shall be limited to reimbursement of the player's stake, excluding all other compensation to be provided by Swisslos, its representatives or agents, or the manager of a sales outlet.

The stake is reimbursed on condition that the player furnishes proof that the predictions were duly submitted and the stake paid. No reimbursement will be provided if a ticket has been tampered with in any way.

Art. 10 Validating and transmitting EuroMillions data to the central unit

10.1 After being saved and secured, player-related data required for any given draw are validated. An independent auditor (i.e. an "Independent Lottery Operator") monitors the validation process and verifies compliance with regulatory procedures. Following validation, Swisslos forwards combination files to the organization entrusted by the EuroMillions Lottery Organizations with determining the winning amounts. These combination files contain all the predictions made as well as any participation codes (see Art. 13.11). Following the draw, both the aforementioned organization and Swisslos identify the winners independently of each other.

10.2 Furthermore, Swisslos does not accept any liability should the total prize payout and, consequently, the prizes in individual prize categories turn out to be lower than expected in the event of the withdrawal or exclusion of a fellow EuroMillions Lottery Organization from participation in a EuroMillions draw. The withdrawal or exclusion of one or more EuroMillions Lottery Organizations has no impact on any guaranteed minimum winnings for prize category 1 in relation to a specific draw; guaranteed minimum winnings will always be paid out, provided at least one legitimate winning prediction is identified within this prize category or the corresponding winnings are allocated to the next EuroMillions draw in accordance with the provisions pertaining to the winnings for prize category 1. Likewise, the withdrawal or exclusion of one or more

EuroMillions Lottery Organizations has no impact on the prospective prizes and number of prizes in relation to an Extra EuroMillions draw (see Art. 13.11).

E. Draws

Art. 11 Draws

11.1 The drawing of the EuroMillions and 2nd Chance winning numbers, and of any Extra EuroMillions winning combinations (see Art. 13.11), takes place on Tuesday and Friday evening under official supervision. The results of the draw, officially confirmed in writing, are final for the entitlement to a prize in the respective draw.

11.2 All predictions registered in the Swisslos Contract Territory in accordance with these Rules of Play and Terms and Rules and all predictions registered in the Contract Territories of fellow EuroMillions Lottery Organizations under the rules applicable there take part in the EuroMillions draw.

11.3 All predictions registered in the Swisslos Contract Territory in accordance with these Rules of Play and Terms and Rules and all predictions registered in the LoRo Contract Territory under the rules applicable there take part in the 2nd Chance draw.

11.4 All Extra EuroMillions combinations registered in the Swisslos Contract Territory in accordance with these Rules of Play and Terms and Rules and all combinations registered in the Contract Territories of fellow EuroMillions Lottery Organizations under the rules applicable there take part in any Extra EuroMillions draw.

11.5 The EuroMillions draw consists of two stages, both of which require the use of an appropriate device. Firstly, the main draw ("draw A") takes place in which five numbered balls are drawn according to the random principle from the relevant device out of a total of 50 balls numbered from one to 50. This is followed by the Star draw ("draw B"), which consists of two balls also being drawn according to the random principle from the relevant device out of a total of 12 balls numbered from one to 12. In exceptional circumstances, a certified electronic random draw device operated under official supervision may be used for this drawing of the five numbers and two stars.

11.6 The 2nd Chance draw consists of one stage that requires the use of a certified electronic device. In this draw ("draw C"), the relevant device selects five numbers from numbers 1 to 50 according to the random principle.

11.7 In the event of an Extra EuroMillions draw ("draw D"; see Art. 13.11), a certified electronic device is used to draw the Extra EuroMillions winning combinations, selecting these according to the random principle and according to the number of prospective prizes available.

11.8 If, for whatever reason, it is exceptionally not possible to make a draw or to make a complete draw on the scheduled date, the draw or draws concerned will be made under official supervision by the next scheduled draw date at the latest. If it is not possible to keep to this schedule, the draw will be postponed to a later date to be announced by Swisslos in accordance with Article 15 of these Rules of Play and Terms and Rules.

11.9 If one of the draws is suspended owing to circumstances for which the person or persons entrusted with making the draw is/are not responsible, the relevant supervisory body will produce a list of the numbers or Extra EuroMillions combinations that have been correctly drawn and then carry out an additional draw in accordance with Articles 11.5 to 11.7. In the event of an additional draw, the balls or Extra EuroMillions

combinations that have already been officially drawn will not be reinserted into the device. The additional draw will only apply to the remaining numbers or Extra EuroMillions combinations that are necessary to complete the draw in accordance with Articles 11.5 to 11.7. Once the additional draw has taken place, the supervisory body will confirm all the winning numbers of the draws.

F. Winnings

Art. 12 Determination and distribution of prizes

12.1 As quickly as possible after the EuroMillions and 2nd Chance winning numbers have been drawn, the number of winners will be determined for each prize category in all Contract Territories, as will the individual winnings in each prize category. 50 percent of EuroMillions stakes ("EuroMillions total prize payout") as well as 50 percent of 2nd Chance stakes ("2nd Chance total prize payout") are allocated to players as winnings.

12.2 The EuroMillions total prize payout is divided into 13 prize categories and into the booster fund (see Art. 13.1-13.2). The 2nd Chance total prize payout is divided into three prize categories (see Art. 14.1).

12.3 All predictions that correctly predict the respective number of winning numbers are placed in the corresponding prize category. Each individual prediction which satisfies the specified conditions will entitle the player to a prize, with the proviso that a prize won in a given prize category excludes entitlement to a prize in a lower prize category with the same prediction. However, an individual prediction can win in both the EuroMillions and 2nd Chance games.

12.4 If only one prizewinning prediction is identified in a given prize category, the entire winnings for this prize category are paid out on that prediction.

12.5 If several prizewinning predictions are identified in a given prize category, the winnings for this prize category are paid out in equal parts on these predictions.

Art. 13 EuroMillions winnings

13.1 The EuroMillions total prize payout is allocated as follows:

Prize category	Number of correct		Percentage of EuroMillions total prize payout
	numbers	stars	
Booster fund			60,00%
1 (Jackpot)	5	2	
2	5	1	2,61%
3	5	0	0,61%
4	4	2	0,19%
5	4	1	0,35%
6	3	2	0,37%
7	4	0	0,26%
8	2	2	1,30%
9	3	1	1,45%
10	3	0	2,70%
11	1	2	3,27%
12	2	1	10,30%
13	2	0	16,59%
Summe			100,00%

Any changes to the above individual prize category percentages will be published in accordance with Article 20.

13.2 The share of the EuroMillions total prize payout to be allocated to the booster fund and prize category 1 is split according to the number of draws in the relevant jackpot cycle (see the table below). A jackpot cycle starts with the first subsequent EuroMillions draw to be made after there has been at least one winner in EuroMillions prize category 1 or after the jackpot has been paid out in accordance with Article 13.4. It ends when there is at least one new winner in EuroMillions prize category 1 or after a new jackpot is paid out in accordance with Article 13.4.

If a Super Draw or a super minimum jackpot guarantee (SMJG) is announced in relation to prize category 1 for a specific draw, then the winnings for prize category 1 and the jackpot on the one hand and the booster fund on the other will be 42 percent and 18 percent respectively until the jackpot cycle ends, regardless of the number of draws in this cycle.

	Prize category 1 / jackpot	Booster fund
Draws 1 to 5 of a jackpot cycle	50,00%	10,00%
From draw 6 of a jackpot cycle	42,00%	18,00%
Super Draw and SMJG including all subsequent draws until someone wins the jackpot	42,00%	18,00%

The monies in the booster fund are used as follows:

- Special increase in the winning amount for prize category 1 in relation to certain Euro-Millions draws (see Art. 13.7-13.8).
- Special increase in the winning amount for other prize categories other than EuroMillions prize category 1.
- Extra EuroMillions prize funding (see Art. 13.11)

13.3 If no player in any of the Contract Territories picks all five numbers and both of the two Stars correctly in any given EuroMillions draw, the winnings for EuroMillions prize category 1 will be rolled over to the next draw within the same prize category, subject to the provisions of Article 13.4 (jackpot system).

13.4 Notwithstanding Article 13.3, rollovers to EuroMillions prize category 1 from the amounts accumulated in the jackpot as per Article 13.3 will only continue until the total winnings for Euro-Millions prize category 1, i.e. including all the amounts allocated from the jackpot, reaches the defined upper prize limit as per paragraph 2 of this Article 13.4. If the portion of the winnings/jackpot that is designated for EuroMillions prize category 1 in accordance with Articles 13.1 and 13.2 exceeds the relevant upper prize limit, this amount will be added to the next-lowest prize category in which there is at least one winner in relation to the same EuroMillions draw. This mechanism will repeat itself in relation to no more than four additional draws. If there are still no winners in prize category 1 in any of the Contract Territories after the last of these four EuroMillions draws with a jackpot amounting to the upper prize limit, the winnings for EuroMillions prize category 1 will, notwithstanding Articles 13.1 and 13.2, be added to the next-lowest prize category in which there is at least one winner in relation to the same EuroMillions draw.

The defined amount to be applied as the upper prize limit after these Rules of Play and Terms of Participation come into effect currently corresponds to the equivalent of EUR 200 million at the applicable bank rate. Each time the jackpot reaches the defined maximum limit, this will in-crease for all subsequent jackpot cycles by EUR 10 million, up to a maximum amount of EUR 250 million.

13.5 If there is no EuroMillions draw winner in any given prize category between 2 and 12 throughout the Contract Territories, the winnings for the relevant prize category will be added to the next-lowest prize category in relation to the same EuroMillions draw. This provision will also apply if the winnings for a given prize category have – as per paragraph 2 of Article 13.4 – been in-creased using a share of the winnings specified for prize category 1, as per Articles 13.1 and 13.2.

13.6 If there is no EuroMillions draw winner in prize category 13 in any of the Contract Territories, the winnings for prize category 13 will be added to the winnings for prize

category 1 in the next EuroMillions draw, subject to the provisions of paragraph 1 of Article 13.4.

13.7 If a minimum jackpot guarantee (MJG) or a super minimum jackpot guarantee (SMJG) is announced in relation to prize category 1 for a specific draw, to be funded if necessary with monies from the booster fund in accordance with Article 13.2, then the relevant guaranteed mini-mum winnings for prize category 1 at the very least will be paid out or, in the event of there being no EuroMillions draw winner in prize category 1 in any of the Contract Territories, added to the winnings for prize category 1 in the next EuroMillions draw, subject to the provisions of paragraph 1 of Article 13.4. Details of special EuroMillions draws such as these will be published in good time via the relevant Swisslos online information channels in accordance with Article 20.

13.8 In the event of a EuroMillions draw being designated in advance as a Super Draw, the guaranteed minimum jackpot (MJG), to be funded if necessary with monies from the booster fund in accordance with Article 13.2, will be paid out in relation to the draw in question. Notwithstanding Articles 13.1 and 13.2, the winnings for prize category 1 (including the amount accumulated in the jackpot) will be paid out in the highest prize category in which there is at least one winning prediction. Details of the Super Draw will be published in good time via the relevant Swisslos online information channels in accordance with Article 20.

13.9 In all Contract Territories, winnings are calculated in euros. Individual winnings in prize category 1 are rounded up to the next-highest full amount in euros, while individual winnings in the other prize categories are rounded down to the next-lowest tenth of a euro. Swisslos pays out winnings in Swiss francs, which are converted from euros at the applicable bank rate (or "daily rate") on the evening following the draw. The prize money converted into Swiss francs for prize categories 2 to 13 may still be subject to alterations to offset currency fluctuations, as per Article 13.10. All winnings calculated in Swiss francs in accordance with Articles 13.9 and 13.10 are rounded exactly to the nearest five cents.

13.10 For every EuroMillions draw, Swisslos – in coordination with Loterie Romande – calculates the difference between (a) 50 percent of all stakes placed within the Swisslos and LoRo Contract Territories, and (b) the cost in Swiss francs for the purchase of EUR 1.10 per prediction within the Swisslos and LoRo Contract Territories in order to fund the total prize payout (Art. 13.1). If (a) exceeds (b), the corresponding amount will be passed on to all winners within the Swisslos and LoRo Contract Territories in prize categories 2 to 13, in relation to the percentage share of the relevant prize category. If (b) exceeds (a), there will be a proportionate reduction in the prize money paid out within the Swisslos and LoRo Contract Territories for prize categories 2 to 13, based on the same principle.

13.11 Any EuroMillions draw designated in advance as an "Extra EuroMillions draw" will consequently also feature an Extra EuroMillions draw. The Extra EuroMillions draw will additionally include a certain number of prizes (or "Extra EuroMillions prizes") that are funded with monies from the booster fund in accordance with Article 13.2. Prizes are determined in advance and will all be of the same value. A unique participation code automatically appears on the entry confirmation ticket for every prediction in an Extra EuroMillions draw. Participation codes are nine-character combinations of letters and numbers ("Extra EuroMillions combinations"), which start with four letters and end with five numbers, e.g. "ABCD 12345".

Based on the number of prospective prizes, a certified electronic draw device is used to draw the winning Extra EuroMillions combinations out of all the Extra EuroMillions combinations submitted in all the Contract Territories.

Swisslos pays out winnings in Swiss francs, which are converted from euros at the applicable bank rate (or "daily rate") on the evening following the draw.

Details of Extra EuroMillions draws will be published in good time via the relevant Swisslos online information channels in accordance with Article 20.

Art. 14 2nd Chance winnings

14.1 The 2nd Chance total prize payout is allocated as follows:

Prize category	Number of correct numbers	Share in % of the 2 nd Chance total prize payout
1	5	35,00%
2	4	22,00%
3	3	43,00%
Total		100,00%

Any changes to the above individual prize category percentages will be published in accordance with Article 20.

14.2 If there is no winner in one of or both prize categories 1 to 2, the winnings will be added in their entirety to the next-lowest prize category in relation to the same 2nd Chance draw.

14.3 If there is no winner in prize category 3, the winnings will be added in their entirety to prize category 1 in relation to the same 2nd Chance draw.

14.4 If there is no winner in any of the three prize categories, the 2nd Chance draw will be repeated until there is one or more winner in at least one prize category.

14.5 An upper prize limit of CHF 950.00 is triggered for prize category 2 if the winnings calculated according to the totalizer principle are higher than CHF 950.00 per legitimate winning prediction. The share of the winnings that cannot be paid out for this prize category owing to the upper prize limit will be added to the winnings for prize category 3 in relation to the same 2nd Chance draw. If the upper prize limit for prize category 2 is triggered and there is no winner in prize category 3, the share of the winnings that cannot be paid out for prize category 2 will be added to prize category 1. If the upper prize limit for prize category 2 is theoretically applied and there is no winner in prize categories 1 or 3, then the upper prize limit will not come into play.

14.6 The winnings per prediction in a lower prize category may not be higher than the winnings per prediction in a higher prize category. If they are, the winnings for the prize categories concerned will be pooled together and allocated equally among all the winners. If, as a consequence, the winnings per prediction of both these prize categories are higher than the winnings in the next-highest prize category, the winnings for all three prize categories will be pooled together and allocated equally among all the winners.

14.7 Once the winnings for two or more prize categories are pooled together in accordance with Article 14.6, the upper prize limit will not be triggered for prize category 2.

14.8 In accordance with common commercial practice, all prizes are rounded to the nearest 5 cents.

G. Notification of draw result / payment of prizes / forfeit of prizes

Art. 15 Notification of draw result

15.1 All information relating to the running of individual EuroMillions draws including any Extra EuroMillions and 2nd Chance draws – in particular exceptional changes in the closing time for submitting predictions – are published via the electronic information channels used by Swisslos.

15.2 Public notification of the draw result, i.e. announcement of the EuroMillions winning numbers, any Extra EuroMillions winning combinations, 2nd Chance winning numbers, and the prize money for each prize category in Swiss francs (see Art. 11 to 14), is in the form of prize bulletins published by Swisslos. They are available for 26 weeks from the day of the draw (payout release date) at Swisslos points of sale, or can be obtained from Swisslos. The payout release date printed on the prize bulletin is the date of the official notification which is decisive for the calculation of the prize expiry date as per Art. 17.

If a player takes part in a EuroMillions draw, Extra EuroMillions draw or 2nd Chance draw anonymously, he or she cannot be notified of a prize. Special provisions apply to entries submitted via the Internet Gaming Platform.

Art. 16 Conditions for the payment of prizes

16.1 Swisslos is deemed to have met, and been released from, its obligation to pay prizes when it, or a Swisslos sales outlet acting on its behalf, makes payment to the bearer of a valid document evidencing the claim to the prize.

16.2 If, prior to payment of a prize, Swisslos should receive information that entitlement to a document evidencing the claim to said prize has been contested, it is entitled to suspend payment and grant the claimant a deadline by which to assert his or her superior right or prove that the question of entitlement to the document evidencing the claim to the prize warrants court proceedings.

Swisslos will make a final decision on the basis of the evidence presented. If the claimant makes the outcome dependent on court proceedings, Swisslos will wait until the court has issued a final and absolute ruling.

Art. 17 Forfeit of prizes

Prizes which are not claimed within 26 weeks of the date of public notification of the outcome of the draws (see Art. 16.2) are forfeited and used for the charitable purpose to which Swisslos contributes.

H. Publication of estimated top-ranking prize payout (jackpot)

Art. 18 Publication of estimated top-ranking prize payout (jackpot)

Once the results of each draw are announced, Swisslos publishes the estimated top-ranking prize payout for the following draw via the electronic information channels (ISP, Internet, online terminals) and by means of a press release. The estimated top-ranking prize payout is referred to as the “jackpot” and is non-binding. No warranty is given for the information provided. Liability as regards incorrect publication of the jackpot is excluded. Article 12 and 13 above are decisive with regard to the determination of prizes.

I. Objections

Art. 19 Objections

19.1 Players whose alleged prizes were not paid out on their assertion of a claim in accordance with these Rules of Play and Terms and Rules may lodge an objection within 10 days of the date of refusal of payment (or, if playing via the Internet, from the date they took note that they were not notified of the prize or that the payout was not made or granted) but by no later than within 26 weeks of the date of public notification of the outcome of the draws (Art. 16.2). For subscription plays, the appeal period starts from the date of the draw for which payout was re-fused.

19.2 The objection must be submitted by registered letter addressed to Swisslos and handed in at an office of Swiss Post by no later than the final day of the period for objection. The appeal must include the player's name and address, the designation of the sales outlet, the number or date of the respective draw, the ticket confirming entry in the draw, as well as the grounds for objection. Moreover, the ticket supporting the claim or replacement ticket, or any other documents supporting the claim, must be enclosed. Objections received late or which do not include all the necessary information cannot be considered.

19.3 Solely those predictions which are stored with Swisslos in compliance with the regulatory provisions and forwarded to the organization entrusted by the EuroMillions Lottery Organizations with determining the winning amounts are relevant for the assessment of entitlement to a prize in accordance with these Rules of Play and Terms and Rules.

J. Publication medium

Art. 20 Publication medium

The website www.swisslos.ch serves as the Swisslos publication medium.

Details relating to changes in the way winnings are calculated and changes to individual prize category percentages (see Art. 13.1 and 14.1) will also appear in this publication medium with binding effect.

K. Final provisions

Art. 21 Operating licences

The licences to issue and operate EuroMillions plus 2nd Chance draws granted in compliance with the hitherto applicable lottery legislation and in accordance with these Rules of Play and Terms and Rules, together with the associated activities, apply solely to Swisslos itself (Art. 1.2).

Art. 22 Decisions of the company management

All decisions in respect of EuroMillions plus 2nd Chance draws are taken by the Swisslos company management or, on the basis of corresponding agreements, by all, or relevant, EuroMillions Lottery Organizations. Insofar as these decisions also affect the supplementary game 2nd Chance, they will be taken in consultation with Loterie Romande. All decisions taken in this manner are deemed to be decisions of the Swisslos company management. Decisions are final and no correspondence will be entered into.

Art. 23 Validity

23.1 These Rules of Play and Terms and Rules govern only participation in EuroMillions plus 2nd Chance in the Swisslos Contract Territory. They enter into force on 25 March 2020. Thereafter, all previous provisions issued governing participation in EuroMillions are no longer valid. Swisslos reserves the right to amend these Rules of Play and Terms and Rules.

23.2 Where the English, French or Italian version of these Rules of Play and Terms and Rules deviates from the German version, the German version alone is binding.

23.3 These Rules of Play and Terms of Participations are published on www.swisslos.ch or can be obtained from Swisslos, P. O. Box, 4002 Basel.
